Outline for ANSI competition paper

March 18, 2014

1. Abstract - this will be written last

2. Introduction - a generic framming of our central arguments

    (a) Protocol's and their nature in the market place

    (b) New business facing protocols

    (c) Network protocols introduction

    (d) Sparse v.s. dense protocol acceptance

3. Body - examples and case studies in computer networks

    (a) IPv4 V.S. IPv6

    (b) Case Study

    (c) Security examples

    (d) Case Study

    (e) Financial examples

    (f) case study

    (g) internation commerce

    (h) case study

4. conclusion - protocols may be bad but it would be much worse without them

    (a) adoption of protocols may be hard

    (b) it is better in the long run

    (c) we need to have policies and protocols in order to communicate

    (d) we even use them when we talk to each other

    (e) it would be impossible to conduct business without certain protocols
